THE NEW RF LINE

Rfyne Aesthetics is Wavemed's innovative production line:

radiofrequency-based technology that is about to open **new frontiers** in the field of Aesthetic Medicine.

THE FIRST MULTIFREQUENCY

Rfyne Aesthetics is the only fractional **radiofrequency** on the market that offers a choice of **output frequencies**.

470 KHz

1 MHz

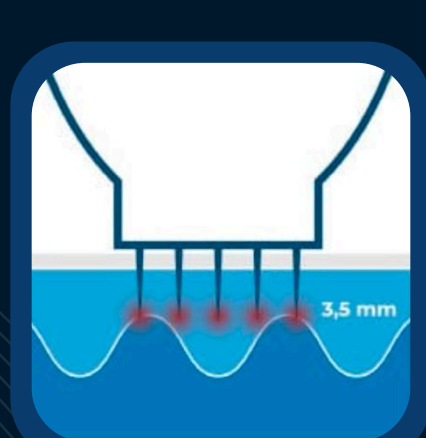

2 MHz

3 MHz

The most **Precise technology** to guarantee effective and safe results according to **specific treatment needs**.

HANDPIECES

In addition to the **fractional** handpiece, the kit also includes a **monopolar** handpiece with automatic electrode recognition (RFID) and a **bipolar** handpiece.

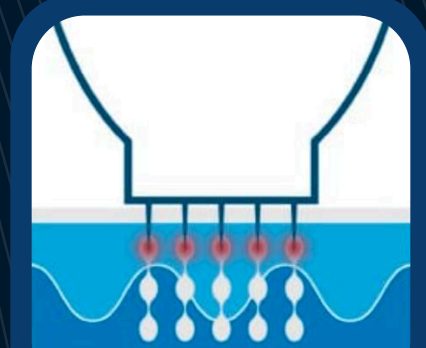

DEPTH OF ACTION

Currently the disposable **micro-needles** are able to gently penetrate the dermis up to a **depth of 3.5 mm**.

NEEDLE-FREE REMODELLING

With its **multifrequency** option, RFYNE Aesthetics delivers energy to targeted tissue depths, reaching **up to 8mm** without full needle insertion. Combining advanced performance with optimal **patient comfort**, it provides significant and **lasting** results, including skin tightening, improved texture, and overall **rejuvenation**.

RFYNE

RETROGRADE MODE

With Retrograde mode provides automatic action at **different depth levels**, starting from the inner part and radiating energy towards the **external rings** of the skin in a **single cycle for uniform** and multi-level treatment at different intensities and frequencies.

TECHNICAL SPECIFICATIONS

Power source	110-240VAC 50-60 Hz
Device type	BF
Insulation class	I
Medical device	Class IIb, CE 1936
Casting	Fire proof ABS
Fuses	2 x T6,3A 250V
RF output power	300 W (medical)
Output frequency	≈ 470 KHz ÷ 3Mhz
Monopolar technology	Interchangeable electrodes (35 - 45 - 60 mm diameter) NFC technology for handpiece identification
Bipolar technology	Bipolar (16mm diameter)
Fractional technology	Depth of action 0.5 ÷ 3.5 mm Interchangeable disposable tips Gold-plated insulated needles Vacuum-assisted technology Retrograde Mode Ergonomic handpiece (pistol-grip and classic)
Connectivity	Wifi, LAN, USB
Size l x h x d	400 × 310 × 230 mm
Accessories	Cart, trolley
Weight	10 Kg
Accuracy of displayed values	± 20%
